**Event of Scientific Nature declared of "Health Interest" by the State of Madrid  
Regional Ministry of Health on March 2d 2010.  
For the second time in the history of the ozone therapy in Spain, an ozone therapy  
event is declared of "Health Interest" by the competent authorities. Bolth events  
have been organized by AEPRIMO.**

With legitimate pride AEPRIMO will organize at the headquarters of the Royal National Academy of Medicine (RANM for its acronym in Spanish) the "International Meeting of Ozone Therapy Schools".

The RANM officially began its journey through the Royal Decree of Philip V on 12<sup>TH</sup> of August 1734. The Academy is a state institution that has nearly three centuries. Its present chairman Prof. Manuel Diaz-Rubio has said that "we must open the academy to society and we will do it."

It is a great honour for AEPRIMO that the Academy has decided to open its doors to the ozone therapy so that it can be subject to scientific scrutiny for two days in the august walls of this century-old headquarter.

**Objective of the "International Meeting of Ozone Therapy Schools"**

To provide the opportunity for more advanced countries in the application of this medical therapy to share their progress; to submit the most significant experiences in different medical specialties; to allow participants to make a comparative analysis that they can increase their knowledge, and apply the best teachings of each school in their patients; to unify criteria and set up a guide of good practices.

**Basic feature of the "International Meeting of Ozone Therapy schools"** Tackling each topic discussed in-depth, providing enough time that a congress does not allow,

and followed by a half hour session for questions and answers. These way participants will have the opportunity to deepen their knowledge and to present their questions directly to professors.
